Xenon 1900 Color

Area-Imaging Scanner

Xenon™ 1900, Honeywell's most advanced area-imaging scanner, has been enhanced to deliver color imaging. Featuring Honeywell's ColorFusion™ Technology and a custom sensor that is optimized for bar code scanning, Xenon 1900 Color offers industry-leading innovation, performance and reliability.

Color imaging unlocks a new world of functionality. It allows enterprises to read color bar codes that were previously unreadable, such as a red bar code on a white background. Additionally, it eliminates the need to use a separate digital camera for color image capture, enabling streamlined workflow and improved productivity. Most importantly, Xenon 1900 Color provides color imaging functionality without sacrificing bar code scanning performance, ensuring that enterprises can meet the data capture needs of today and tomorrow.

Paired with advanced software algorithms that are optimized to take advantage of the scanner's custom image sensor, ColorFusion Technology enables color image capture without negatively impacting the aggressive bar code scanning enabled by Adaptus® Imaging Technology 6.0.

A new space-saving design mounts critical components on a single board, eliminating the need for connectors. A more reliable design with fewer components minimizes downtime and improves serviceability. Its small form factor ensures that the scanner fits well in virtually any sized hand, reducing operator fatigue.

Built with durability in mind, Xenon 1900 Color can withstand up to 50 drops to concrete from up to 6 feet. An IP41-rating provides added protection. With a solid-state design backed by a five-year warranty, Xenon 1900 Color is constructed to deliver years of uninterrupted performance.
